

ABSTRACT OF THE DISCLOSURE

Pillar protection assembly (1) consisting of a plastic sleeve (7) inside which a number of plastic foam blanket sections (6) are arranged. The sleeve (7) can be provided with information on the outside and has a closure (8) so as to fix this to the pillar (5) after it has been wrapped around the latter. The plastic foam material of the plastic foam blanket (6) consists of a foam matrix in which particles are incorporated that preferably consist of a recycled material. The plastic foam material used can be polyether or polyurethane.
